

Upper Daggs/Star Wash Zone AE Floodplain Delineation Study

Study Notification/
Right of Entry
for Surveying and
Reconnaissance Purposes

Introduction

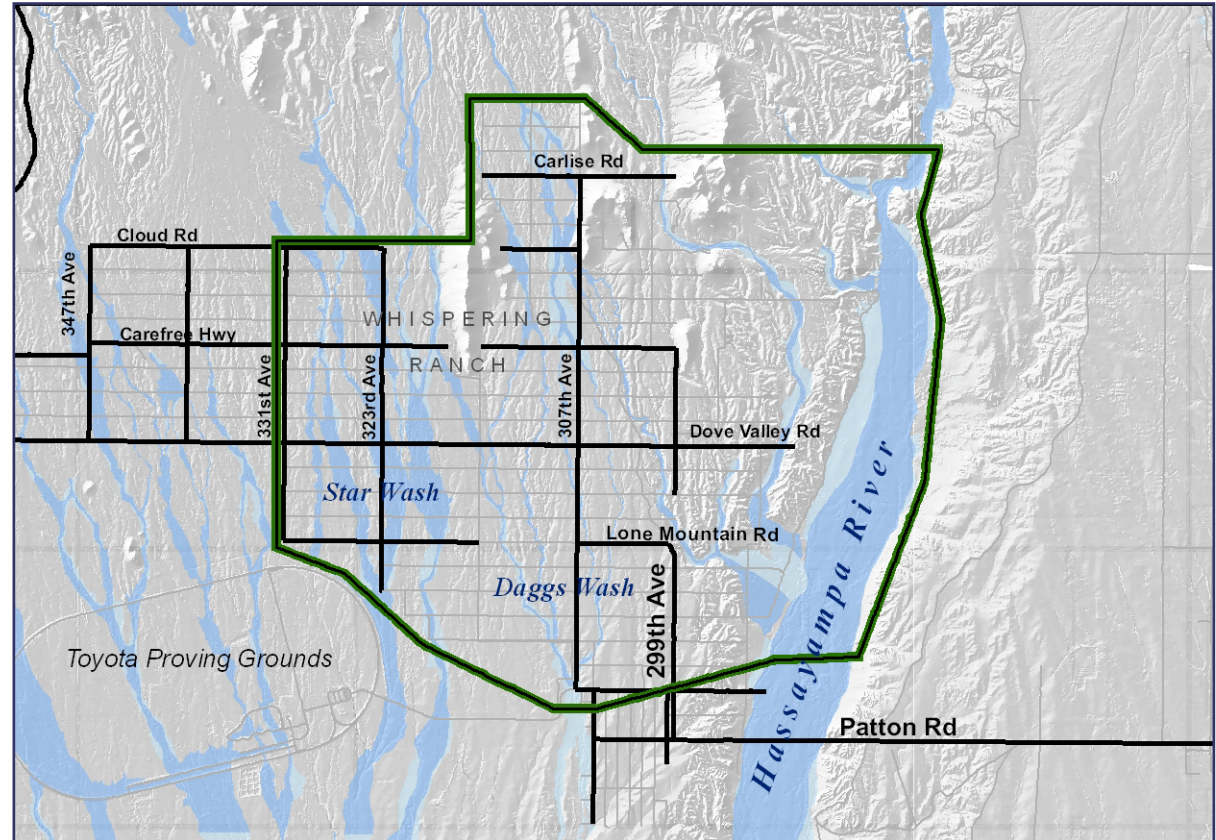

For more than 45 years, the Flood Control District of Maricopa County (District) has provided regional flood control services to County residents to reduce their risks of injury, death, and property damage from flooding.

The District has contracted with the consulting firm, Wood, Patel and Associates, Inc. to provide detailed delineations of floodplains for tributaries to Daggs and Star Washes, and the Hassayampa River. Existing approximate floodplains along approximately 60 linear miles of tributaries will be further defined, and floodplains may be identified and delineated for up to 10 additional linear miles.

Project Overview

The study area is immediately west of the Hassayampa River, north of Patton Road. The northern boundary of the study is approximately 10 miles south of the Town of Wickenburg. Based on property ownership records, if you have received this mailer, you have property that is either in or near an existing approximate floodplain, or may contain some newly delineated floodplain.

The study and resulting maps will be used for floodplain management purposes and submitted to the Federal Emergency Management Agency (FEMA) for flood insurance information and revisions of Flood Insurance Rate Maps. This study should be available to the public for review and comment in approximately 12 months.

For more information, visit the District's Web site at www.fcd.maricopa.gov.

Next Steps

This brochure is intended to inform you of the start of this study, and to advise you that it may be necessary to briefly enter or cross your property to perform surveying and reconnaissance activities in support of the study. This activity should not result in any inconvenience to you or damage to your property. If you have any objection to the entry onto your property, please notify Mark Mayer at 602-506-6726. Otherwise, it will be assumed that you consent to the entry onto your property.

Parcel number(s) for your property within the study area is (are) located on the mailing label above your name. If you wish to get floodplain information for your parcel(s), please contact Mark Mayer. The project team is interested in receiving any information you may have regarding past flooding in the area and/or related problems.
